SPCC

Spill Prevention Control and Countermeasures

September 2003

For Your Today For Their Tomorrow

What is SPCC

Spill Prevention Control and Countermeasure Plan

- Federally dictated for the Facility: One for all Ft. Hood
- Managed by the Environmental Division

For Your Today For Their Tomorrow

How does it affect you?

- Training – Initial and annual
- Planning – included in your SOPs
- Notification – Report to the fire department
- Inspections – Storage areas (new and used products)
- Documentation – Maintenance logs, POL storage maintenance, secondary containment use, inspections

For Your Today For Their Tomorrow

The Basics of Spill Response:

1. **SAFETY FIRST – DONT BE A HERO**
2. **CALL THE FIRE DEPARTMENT**
3. **CONTAIN THE SPILL *IF POSSIBLE***
4. **EVACUATE IF NEEDED**

For Your Today For Their Tomorrow

Bob says:

1. **Judge the Situation**
2. **Take Immediate Action**
3. **Notification – contact the Fire Department**

For Your Today For Their Tomorrow

What information you'll need:

1. **LOCATION of the spill (building # is best, intersection is okay, unit information isn't enough)**
2. **MATERIAL SPILLED JP-8, gasoline, batteries**
3. **WHERE where the spill is coming from (tank, vehicle, container, etc.)**
4. **WHERE the spill is going (pooling on concrete, dirt, running down the ditch)**
5. **NOTE any fumes, gasses, odors, (don't go closer to sniff!)**
5. **CONDITIONS (raining, on a slope, within a creek)**
6. **CONTACT information – name and phone number**

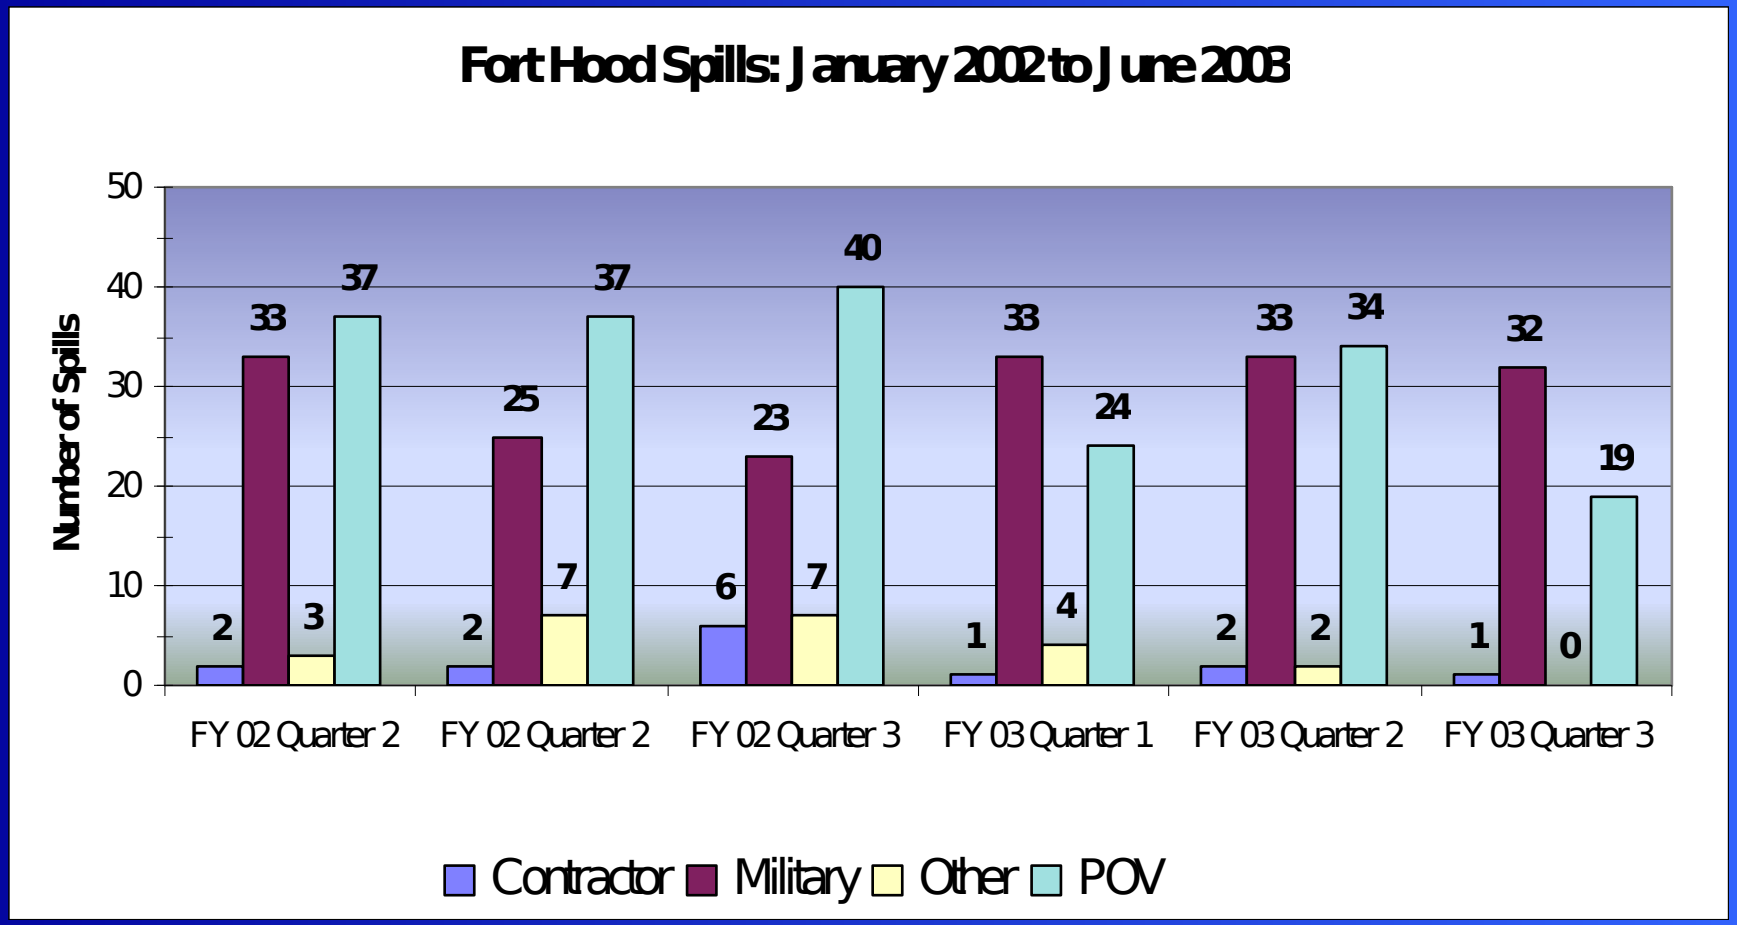
Procedures

- In Garrison: contact the Fire Department at 117 or or 911
- On Ranges: contact Range Control at 287-3130 and monitor frequency 3045 (alternate) 3830
- Away from Ft. Hood, call 911 and notify local authorities

Where our spills come from:



Common Risk Area:

- Fueling Operations:
  - Bulk Fuel Tankers leaving the Tank Farm
  - Transfer operations
  - Small container accidents (jerry cans spilling)
- Never fill a tanker more than 90% full – teach your coworkers
